Dxbox-C5

Dxbox-320-C5

High Efficiency Fully Automated Digital Radiography System for Casting Inspection

APPLICATIONS

- Stationary system for castings X-ray inspections
- High speed routine work for quality control of aerospace
 parts or structures on the 65 cm diameter turn table
- ▶ Castings, weldings, additive manufacturing, ...

KEY FEATURES

Efficiency

Dxbox-C5 is a revolutionary system designed with **radio- transparent turning table** so that X-ray parts can be inspected in any direction, even through the turn table. Handling and positioning the parts manually is no more needed.

XRIS

Unique

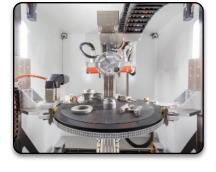

Dxbox-C5 is unique in the world and is particularly important for applications where the complexity of the parts is such that they must be X-rayed **in many different angles** to achieve all requested norms.

User-friendly

An intuitive HMI design offers a live 3D position next to the door.

Operator can easily control the axis and visualize and adjust their current position.
