

X-MET8000

HITACHI
Inspire the Next

PRECIOUS METALS

The X-MET8000 is a handheld X-ray fluorescence (XRF) analyzer that provides you with non-destructive multi-element analysis of large and small precious metals items.

It provides fast and accurate analysis, with customizable results screen for fast valuation – display the information that is important to you e.g. karat value and/or full chemistry. You can store up to 100,000 results including spectra and sample image (if camera is fitted) and create your own reports using X-MET report generator.

X-MET8000 allows you to maximize productivity and profits through smarter buying and selling of precious metals.

Why the X-MET8000 is the perfect tool for your business

EASY TO USE

Proven “point and shoot” simplicity means minimal operator training needed. It comes with a 3-year warranty as standard.

LOW LEVELS OF DETECTION

Analyze impurities and toxic elements like Pb and Cd to identify potentially harmful pieces.

FULLY PORTABLE

Compact and light (1.5 kg with battery), the X-MET8000 can be transported and used anywhere anytime. All accessories fit in the small and robust transport case.

RUGGED

IP54 compliant for protection against dust and water. Optional shield (Optimum and Expert models) prevent detector and X-ray tube damage when testing small components and sharp objects.

POWERFUL DATA MANAGEMENT

Download results and reports directly to a USB memory stick using a CSV format or tamper-proof PDF. You can print results on paper or sticky labels using a portable Bluetooth printer to attach them to measured items to avoid mix-ups.

SUPPORT WHEN YOU NEED IT

Our global network of service hubs can offer a full range of technical support to keep you up and running.

Other products

We have been providing industrial analysis products for over 45 years.

Benchtop small-spot XRF: for the rapid analysis of intricate, small pieces (e.g. individual links on a necklace) and the determination of coating thickness (e.g. Rh on white gold).
